Dear Sir/Madam,

Subject: Invitation to attend presentation on the Wechsler Intelligence Scale for Children – IV (India Edition)

It is with immense pleasure that I share with you the Wechsler Intelligence Scale for Children® - Fourth Edition (India) (WISC-IVINDIA) has now been adapted and normed for India after a rigorous standardization process at Pearson Clinical and Talent Assessment (PCTA). PCTA is the owner of some of the most widely used and respected psychological assessments in the world including the WISC and publishes these under the brand Psychcorp. As you know that the WISC is considered the gold standard for assessing intelligence, we have arranged for a series of nation-wide road shows, to help Psychologists know more and understand this assessment more closely. The Hyderabad chapter will be conducted in association with Pearson Authorized Training Center – Ripples. We would like to cordially invite you to this program for a presentation on the Wechsler Intelligence Scale – Fourth Edition (India) by the WISC India Standardization Project Leader.

The Wechsler Intelligence Scale for Children® - Fourth Edition (India) (WISC-IVINDIA) builds on contemporary approaches in cognitive psychology and intellectual assessment, to give you an up to date, culturally appropriate and relevant tool to support your clinical judgment and guide your intervention.

The presentation would be made by Dr. Michelle Joseph. Dr. Michelle Joseph is a Clinical Child Psychologist. She completed her M. Phil from the National Institute of Mental Health and Neurosciences, Bangalore and Ph.D. in Child and Adolescent Psychiatry from King's College London, UK. She is trained in conducting an array of psychological assessments and psychotherapy. Her experience includes work as a psychologist in a school setting, as well as work in research settings. In the school setting, she has utilized psychological assessments and worked closely with special educators, to put in place individualized intervention programs. In the research setting, she has worked in the areas of parent-child attachment and stressful life events and coping in adults. At present, she is part of the Product Development Team at Pearson Clinical and Talent Assessment, India and is the Project Leader for the WISC-IVINDIA Project.

Program details
